

LUCAS LUTAR

Brewster, NY · (914) 656-8290 · lucasnlutar@gmail.com

SUMMARY

MSc Economics & Policy (Distinction expected, King's College London) and BA Economics (Cornell), with hands-on experience across finance, healthcare technology, and policy. Combines rigorous econometrics and causal inference with real programming ability (Python, R, self-built applications) and advanced Excel modeling. Comfortable owning data end to end: extraction, cleaning, analysis, visualization, and translating findings into clear recommendations for senior stakeholders.

EDUCATION

King's College London - MSc Economics & Policy, Distinction expected Sep 2025 - Sep 2026

- Coursework: Advanced Econometrics, Causal Inference, Advanced Microeconomics, Advanced Macroeconomics, Evaluating Public Policy.

Cornell University - BA Economics, GPA 3.74, Dean's List, HSF Recipient Aug 2021 - Dec 2024

- Coursework: Applied Econometrics, Probability Models, Advanced International Finance, Python.
- **Teaching Assistant, Introduction to Microeconomics (Fall 2024):** supported a ~200-student lecture course; held weekly office hours and assisted with student instruction/tutoring.

RESEARCH

Tan Lines and State Lines: Tourism, Housing Pressure, and Resident Out-Migration from Hawai'i

MSc Dissertation, King's College London, 2026 (10,899 words) · Code + Data available on request

- Built two original county-year panels, a Hawai'i panel (1990-2022) with directly measured visitor volume and a 1,000+ county national panel, by harmonizing six government sources (IRS tax-return migration across three file-format eras, DBEDT visitor reports, BLS LAUS and QCEW, FHFA house prices) in a reproducible Python pipeline with documented series-break controls.
- Estimated fixed-effects models with inference valid at small cluster counts (wild cluster bootstrap, Driscoll-Kraay errors) and two natural experiments, Hurricane Iniki (1992) and a COVID-19 synthetic control for Maui, to separate the housing and labor channels linking tourism to resident out-migration.
- Found the two channels operate simultaneously in opposite directions: visitor volume is robustly associated with out-of-state departure through the housing margin, while tourism employment retains residents; Hawai'i's geography, not its behavior, routes the displaced out of state.
- Findings adjudicate a live policy dispute over Honolulu's short-term-rental rules (Bill 41 / Ordinance 22-7), with a committed out-of-sample Lahaina displacement test awaiting the next IRS data release.

King's Think Tank - Policy Analyst, Migration Economics Nov 2025 - August 2026

- Analyzed recruitment fees, remittance costs, and policy shocks as structural frictions in labor migration using World Bank, ILO, and UN DESA data; published "The Development Tax on Mobility" (King's Think Tank, Jan 2026).

TECHNICAL SKILLS

- **Programming & statistical:** Python, R, Stata, SQL, GDScript (Godot).
- **Methods:** Econometrics, causal inference, natural-experiment and quasi-experimental design, fixed-effects panel models, scenario and sensitivity analysis.
- **Data & reporting:** Panel data construction, data cleaning and wrangling, advanced Excel (modeling, macros, automation), financial modeling, dashboards, data visualization.

PROFESSIONAL EXPERIENCE

Epic Systems - Project Manager, Healthcare Data & Billing (Madison, WI) Jan 2025 - Aug 2025

- Built dashboards in Epic's analytics tools (Slicer Dicer, Clarity) and analyzed hospital operational and billing data to inform decisions for hospital leadership.
- Maintained Excel-based billing quality reports using macros to track claims falling through the coding process, diagnosing root causes, correcting coding, and re-testing to confirm resolution.
- Led Penn State Health's billing implementation transition and trained specialist teams; supported OCHIN Epic rollouts, improving billing-code accuracy for complex case types such as surgery.
- Delivered product demos and implementation roadmaps to senior executives, aligning milestones with business outcomes and accelerating adoption.

Amazon - HR Business Partner, Data & Process (Carteret, NJ)

Jun 2024 - Aug 2024

- Led regional research across six sites, analyzing HR policy data to identify process improvements that reduced attrition by 50% at my site.
- Applied data-driven methods to assess the impact of organizational changes on employee outcomes and productivity.

Maplelane Capital - Analyst, Investment Data & Modeling (New York, NY)

May 2024 - Jun 2024

- Analyzed alternative datasets, including credit-card transaction and web-traffic data, to surface trends in stock volume and demand.
- Built financial models (revenue projections, cost analysis, key statements) and ran scenario and sensitivity analysis to improve forecasting accuracy and inform investment views.

Silver Point Capital - Intern, Data & Vendor Analysis (Greenwich, CT)

Jun 2023 - Aug 2023

- Built a master vendor Excel model with macros consolidating agreements across 300+ recruiting agencies to control and reduce fund expenses.
- Created structured datasets of 300+ firms, improving data accessibility for research and compliance reporting; monitored expert calls for SEC compliance.

DISTINCTIONS & PROJECTS

- **Peruvian National Fencing Team - Captain:** Gold medal for Peru, 2022 Bolivarian Games; ranked top 200 globally; Olympic hopeful.
- **Publication:** “The Development Tax on Mobility,” King’s Think Tank Blog, Jan 2026.
- **Self-built 2D RPG (Godot/GDScript):** Independently designed and programmed a complete 2D role-playing game, self-taught, demonstrating end-to-end systems building, logic design, and data management.
- **Sigma Alpha Mu - Treasurer (Exchequer):** Managed \$350,000+ in housing and event funds.
